Components

- A Keyboard
- B Charging Cable
- C Quick Start Guide
- D Caps Lock
- E MicroUSB Charging Connector
- F Bluetooth Status Indicator Light
- G Power/Charging Indicator Light
- H On/Off Switch/Bluetooth Connection Button

Insert Your iPad and Connect the Keyboard

1

2 Place your iPad on the ledge.

2 Press the On/Off Switch for 1.5 to 5 seconds. The Power Indicator Light  glows.

- 3 On your iPad, tap **Settings**.
- 4 Open **Bluetooth** and make sure Bluetooth is on.
- 5 On the Keyboard, press the **Bluetooth Connection Button**. The **Bluetooth Status Indicator Light** starts blinking for 10 minutes or until connected to a device.

- 6 The Keyboard now appears on your iPad screen. Tap **Bluetooth 3.0 Keyboard**.
- 7 Your iPad screen displays a passkey. Enter the passkey on the Keyboard, and press Enter.
- 8 Your iPad screen shows the Keyboard as Connected. On the Keyboard, the Bluetooth Status Indicator Light turns off.
- 9 You can now use your Keyboard to type in any app.

NOTE: To insure the **K Lock** key works correctly please ensure you do the following:
Home page > Settings > General > Passcode key. Verify "Require Passcode" is set to **"Immediately"** otherwise a keyboard unlock will not require a passcode. Go back to previous menu and verify **"Passcode Lock"** is On.

Note the following about the Bluetooth connection between the keyboard and your iPad:

- Keyboard will go into pairing mode if the **On/Off Switch** press for 5 seconds or longer then release (regardless of on or off state).
- Press the **On/Off Switch** for 1.5 to 5 seconds then release = toggle keyboard power (on to off, off to on).
- First turn (Factory default, no prior paired BT devices) – enter pairing mode automatically.
- In ON state only - Hold **"CTRL+FN+F"** for 3 seconds or more = reset to factory default mode (clear all previously paired BT devices in memory), ALL LEDs should flash on and off 3 times and keyboard should turn to off mode.
- If no active key press for 1 minute, the unit should go to sleep mode.
- Anytime a key is pressed in sleep mode, the keyboard should automatically connect to last paired iPad if present. If iPad is not found after waking from sleep mode within 30 seconds, the device should go back to sleep.

LED Behavior and Explanation

LED Behavior	Explanation
  	<ul style="list-style-type: none"> If the Keyboard is off, asleep, or the battery is dead, the LEDs will remain off.
  	<ul style="list-style-type: none"> Initially at power-up, the Power LEDs will turn on and stay lit for 5 seconds. After 5 seconds the Power LED will turn off.
  	<ul style="list-style-type: none"> When the Bluetooth Connection Button is pressed, the Bluetooth LED will begin to blink for 10 minutes or until connected to an iPad. Blink pattern: ON 1s, OFF 0.5s
  	<ul style="list-style-type: none"> Once the Keyboard is connected with your iPad, the Bluetooth LED will go off.
  	<ul style="list-style-type: none"> While the Keyboard is connected to your iPad, the state of the Caps Lock toggle is shown by the Caps Lock LED.
  	<ul style="list-style-type: none"> When the Keyboard is plugged into a power source, the Charge LED will turn red and turn off only when charge is completed.

Charge the Battery

Charge your Keyboard Expert before initial use or when the Charging Indicator  glows red.

- 1 Insert the small end of the **Charging Cable** into the **micro USB Charging Connector** on the Keyboard.

- 2 Insert the other end of the **Charging Cable** into your iPad charger.

- 3 Plug your iPad charger into a working outlet. The **Charging Indicator Light**  glows red.
- 4 When the Keyboard is fully charged, the **Charging Indicator Light** turns off.

Troubleshooting

I can't connect the Keyboard to my iPad.

Try the following in sequence. You can stop when the problem is fixed.

- 1 Make sure you have installed and set up Bluetooth correctly on your iPad. Check the documentation that came with your iPad for instructions.
- 2 Make sure that the Keyboard is within range of your iPad. Maximum Bluetooth range is about 10 meters/33 feet.
- 3 If your iPad is connected to other Bluetooth devices, you may need to disconnect some devices before you can connect to the Keyboard.
- 4 If you changed any Bluetooth settings on your iPad, try connecting the Keyboard to your iPad again.
- 5 Make sure that both your iPad battery and the Keyboard battery are sufficiently charged.

WARNING! IMPORTANT SAFETY INSTRUCTIONS

Failure to read and follow these safety instructions could result in fire, explosion, electrical shock or other hazard, causing serious and/or fatal injury and/or property damage.

- Do not modify, disassemble, open, drop, crush, puncture, or shred the Keyboard.
- The Keyboard contains a lithium-polymer battery, which is flammable. Keep away from open flame.
- To prevent short circuit or other potential hazards, prevent metal objects such as coins or keys from coming into contact with the Keyboard, and do not insert foreign objects into the Keyboard or its ports.
- Keep your Keyboard dry, and do not use with wet hands. Moisture in or on the Keyboard may lead to electrical shock. If exposed to moisture during use, unplug the KeyStand immediately. If your Keyboard gets wet, have a qualified technician evaluate the product's safety before resuming use.
- Your Keyboard may become warm during operation. This is normal. However, to prevent overheating, keep area around Keyboard ventilated and do not place anything on or around Keyboard during operation. Do not operate your Keyboard near a heat source, heat vent, or in direct sunlight. Your Keyboard should be used in temperatures between 50–80°F (10–27°C).
- If the Keyboard begins to swell or expand, emits a strong odor, or becomes hot to the touch, discontinue use of the Keyboard, and have the product examined by a qualified electronic technician.
- Inspect your Keyboard and cables for damage before use. Have any damaged part repaired or replaced before use.
- Your Keyboard is not user serviceable. Do not attempt to open, modify, or repair.
- If the battery inside the Keyboard leaks for any reason, discontinue use, and do not allow the Keyboard's contents to contact your skin or eyes. In the event of accidental contact wash the affected area with large amounts of water and seek medical attention immediately.
- Your Keyboard is not a toy. Keep them away from children. Insure that all persons who use this product read and follow these warnings and instructions.
- Do not leave the Keyboard on prolonged charge when not in use.

Enhancing Performance by Proper Care and Storage of your Keyboard

- Do not store your Keyboard either fully charged or discharged. It is best to store your Keyboard with at least 30 % charge remaining.
- Avoid frequent full discharges because this puts additional strain on the battery in the Keyboard. Charge your Keyboard between uses even if it is not fully discharged. The lithium-polymer battery used in this product has no "memory effect." Therefore, several partial discharges with frequent recharges are better than one full discharge, and will help prolong the life of your Keyboard. Short battery life in laptops is mainly caused by heat, rather than charge/discharge patterns.
- Do not store your Keyboard at elevated temperatures (such as in your car) or in high humidity.

Disposing of your Keyboard

- Do not incinerate or dispose of your Keyboard in a fire or microwave.
- Do not dispose of your Keyboard as ordinary refuse, as it contains a lithium-polymer battery. Consult your local municipal or civil authority for instructions on correctly disposing of a lithium-polymer battery.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
